

HEALTHeNL Application Changes

What's Changing and What's Staying the Same — Physician Reference

Central Intake — Orthopedics & Ophthalmology

Central Intake is the digital referral workflow for Orthopaedics and Ophthalmology only. Post go-live: new referrals will be available in both HEALTHeNL and CorCare (EpicCare Link).

Category	☑ Staying the Same	📄 What's Changing
Scope of Impact	Only Orthopaedics and Ophthalmology have digital referral workflows — scope is narrower than initially assumed Clinical purpose and referral logic remain the same	New referrals for these specialties will be available in both HEALTHeNL and CorCare (EpicCare Link)
Referral Process	CorCare referral logic is transferable across specialties — learning one means learning all Physicians will still submit structured digital referrals for these two specialties	New interface, new questions, new workflow location in CorCare Paper, fax, and mail physicians are unaffected — no change for that cohort
Access & Technology	Central Intake remains active in HEALTHeNL — referrals can continue to be submitted there	Physicians in these specialties will also be able to submit referrals through CorCare at go-live
Change Impact	Change is limited to Orthopaedics and Ophthalmology referring physicians — not a province-wide change	Physicians in these specialties must become familiar with the new CorCare referral workflow

Commented [DW1]: Spelling error. Replace with CorCare
