

MCP Billing in CorCare Hyperspace

Here's what you need to know about CorCare—the new, modern digital health system transforming care across Newfoundland and Labrador.

CorCare is a province-wide health information system replacing outdated digital tools. It enables fast, secure collection and sharing of electronic medical records—helping you spend less time searching and more time caring.

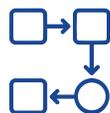

One unified system

That will be used for storing, managing, and transmitting clinical information.

Built with expertise

700+ subject matter experts, including 180+ physicians, contributed to its design.

Better workflow

Updated digital tools and enriched MyHealthNL features support stronger collaboration between clinicians, staff, and patients.

■ Full MCP integration is planned, but will not be available at CorCare Go-Live in April, 2026

- An interim billing solution was developed with physicians and billers and reviewed by the Department of Health and Community Services and the NL Medical Association.

■ MCP codes and reports available in Hyperspace

- Physicians can search and enter from the list of MCP service codes, and a condensed “pick list” will be available per specialty.
- Reports can be generated of the billing and diagnostic codes physicians have entered and/or their clinical activity.
- Physicians and their support staff will be provided with access to view, download, and print reports.

■ Submit bills with your current billing vendor

- Billing submission and reconciliation will be done via your current billing software. For Med Access users, you will continue to be able to use Med Access, supported by eDOCSNL and Telus.

■ Support is available

- Training and support materials will be made available for self-directed learning and review. There is minimal time commitment associated with training for physicians and support staff.
- Questions: CorCareProviderSupport@nlhealthservices.ca

■ The interim billing workflow in Hyperspace is optional

- Choosing to use the interim solution described in CorCare Hyperspace is optional. You can also still use your preferred method for collecting your clinical activity and billing codes.
