

# In Basket, CorCare Link

## Here's what you need to know about CorCare—the new, modern digital health system transforming care across Newfoundland and Labrador.

CorCare is a province-wide health information system replacing outdated digital tools. It enables fast, secure collection and sharing of electronic medical records, helping you spend less time searching and more time caring.

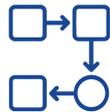

### One unified system

That will be used for storing, managing, and transmitting clinical information.

### Built with expertise

700+ subject matter experts, including 180+ physicians, contributed to its design.

### Better workflow

Updated digital tools and enriched MyHealthNL features support stronger collaboration between clinicians, staff, and patients.

## What is In Basket?

- In Basket is a secure messaging, notification, and workflow management system built into CorCare Link.
- In Basket functions like an internal email system, allowing you to send and receive messages, view referral notifications, result notifications, and other clinical communications.
- You can customize what you would like to see in your In Basket.

## Key Types of Messages in your In Basket?

- **Results** — lab and imaging results for your review.
- **Referral notifications** — accept and reject letters for referrals you've submitted.
- **Secure messages** — view communications from other providers and care teams.
- **Unsigned orders** — orders pended on your behalf that need your signature.
- **CC'd charts** — copies of clinical documentation relevant to your patients.

## Sharing content

- In Basket allows you to forward messages to other CorCare providers or pool recipients using the forward function.
- If you need to send information to external third parties, such as insurance companies, use your usual external processes.

## Support is available

- Various support materials are available on the CorCare [website](#).
