

MyHealthNL powered by MyChart for providers

Here's what you need to know about CorCare—the new, modern digital health system transforming care across Newfoundland and Labrador.

CorCare is a province-wide health information system replacing outdated digital tools. It enables fast, secure collection and sharing of electronic medical records, helping you spend less time searching and more time caring.

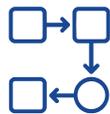

One unified system

That will be used for storing, managing, and transmitting clinical information.

Built with expertise

700+ subject matter experts, including 180+ physicians, contributed to its design.

Better workflow

Updated digital tools and enriched MyHealthNL features support stronger collaboration between clinicians, staff, and patients.

MyHealthNL can help providers by empowering patients

- **NL Health Services appointment management** - Access to manage appointment schedules and accept fast-pass offers may mean fewer missed appointments and smoother clinic operations.
- **Supportive discharge planning and transitions** - After-visit summaries, appointment details and standardized education materials available to patients.
- **Guiding patient expectations** - Since patients can see their test results without delay, it's important to discuss what they might expect to see when ordering tests and making referrals.
- **Expanded proxy access** - Caregivers who have access to records are better prepared for visits and communication with them is easier.
- **Care companion tools** - These tools help track patient progress in real time and support patients in sticking to their treatment plans.

Clinical notes

- Some NL Health Services' clinical notes are visible in MyHealthNL once signed. When patients and families can read their clinical notes, trust and communication improve.

Patients are active participants in their own care journey

- Acknowledge the patient's access and use it as an opportunity for shared decision-making.

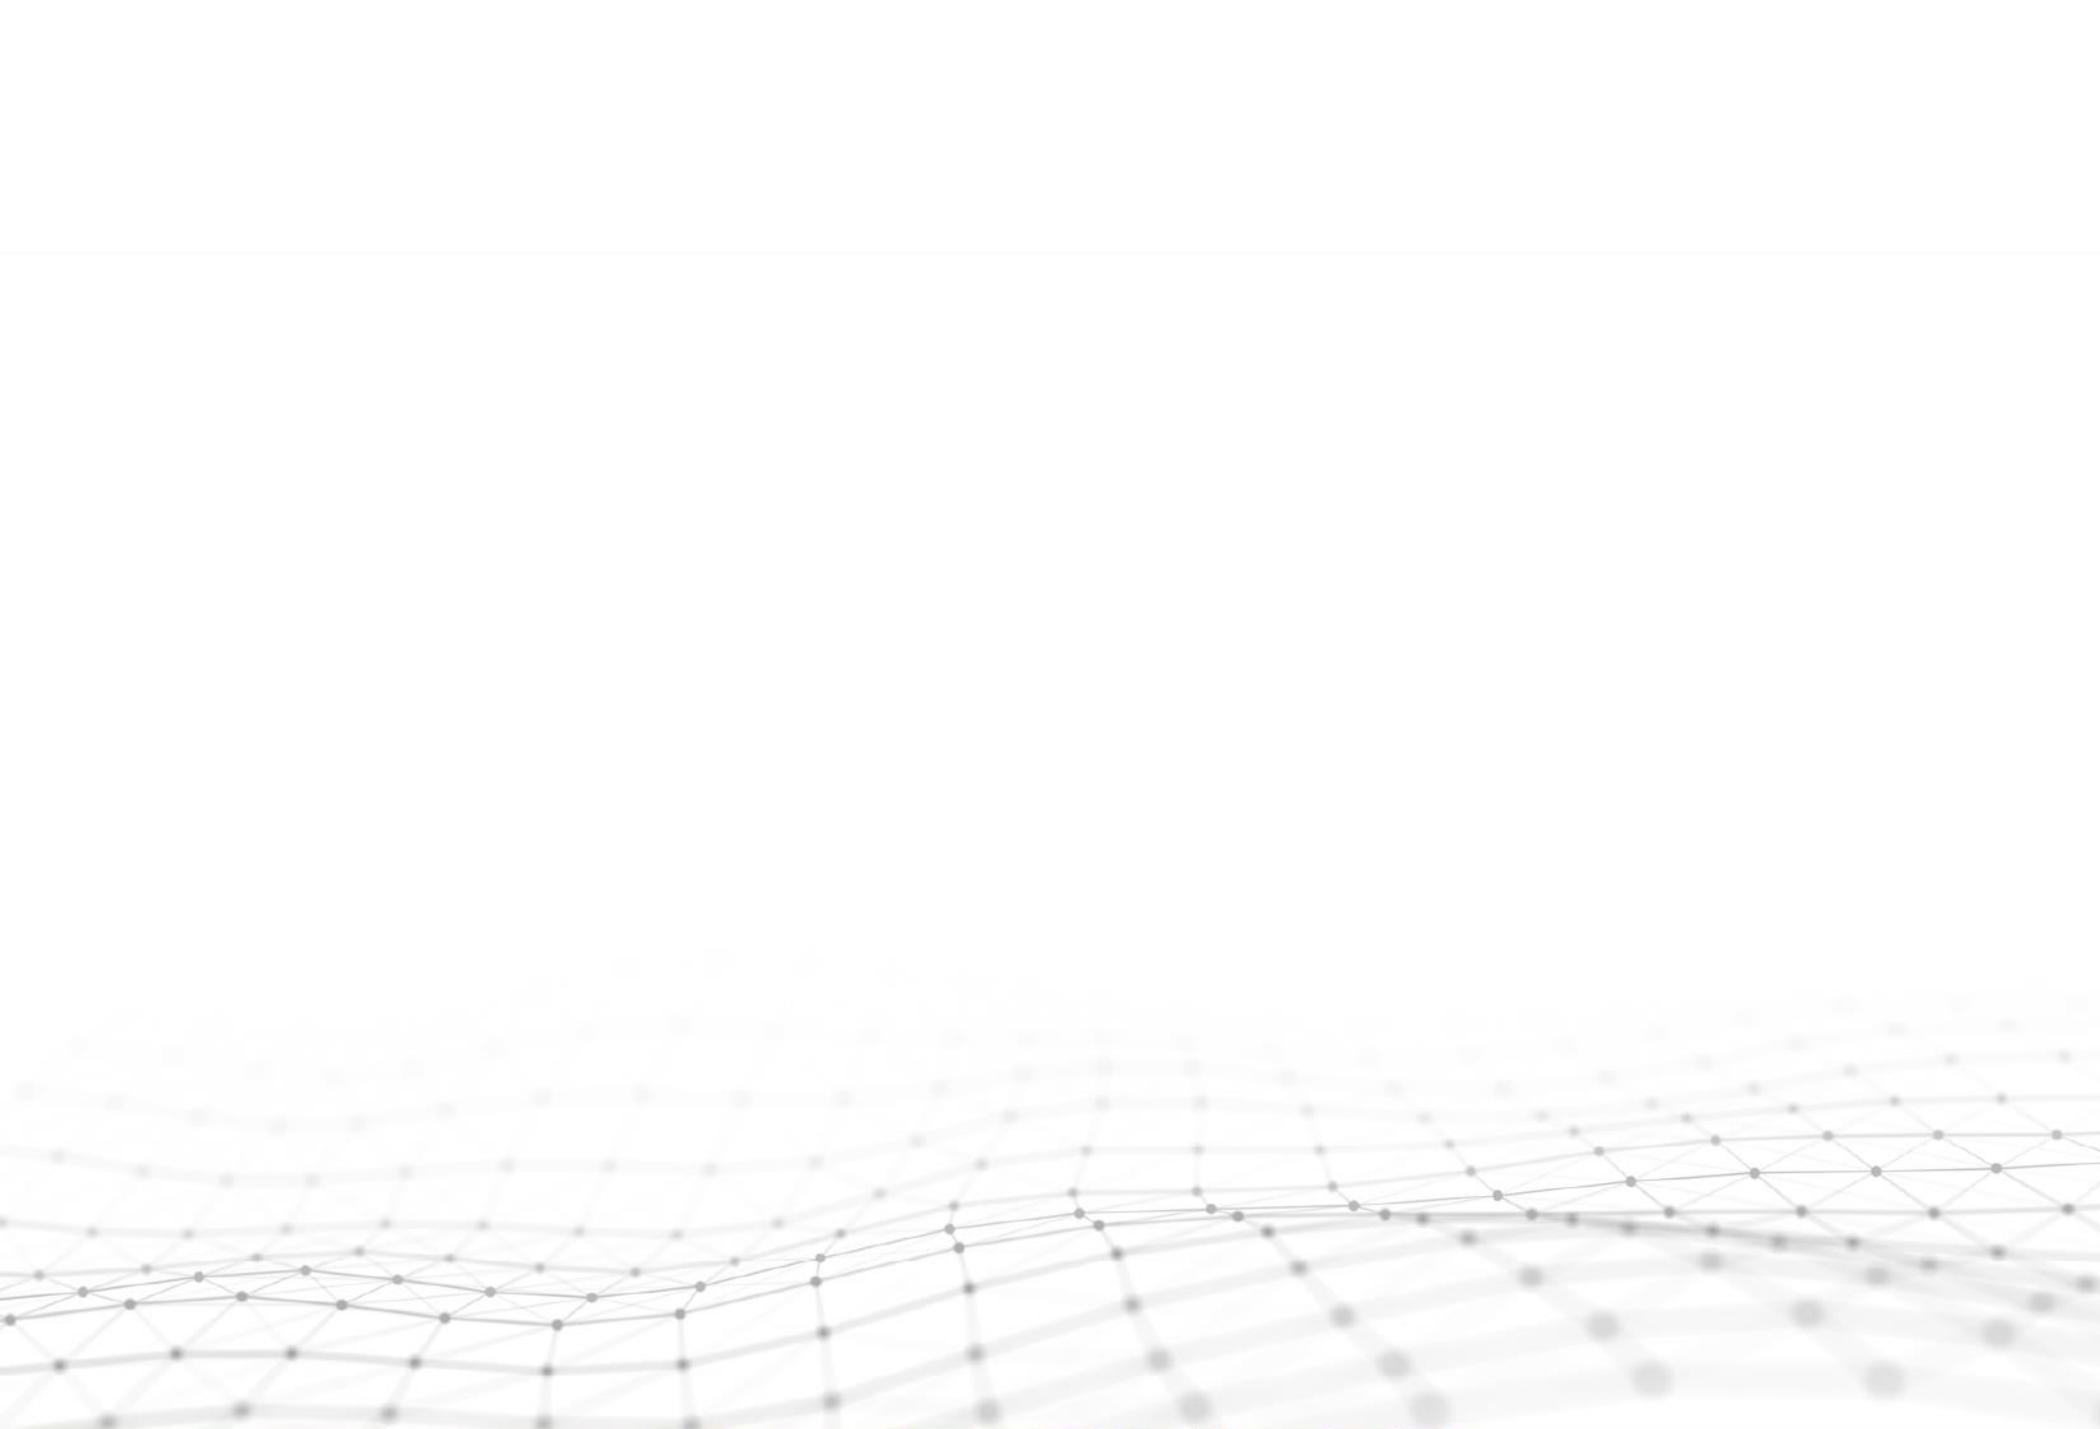

Support is available

- Review the MyHealthNL Providers Handbook on the [CorCare website](#).
